# SET-UP

## Set-up keyboard layout on Windows 11@ Step-by-step guide

### 1. Download the Layout:

- Go to your web browser and visit:  
<https://keyboard.aveteam.org/home>
- Click the blue "Download" button. This will download a zip file to your computer.

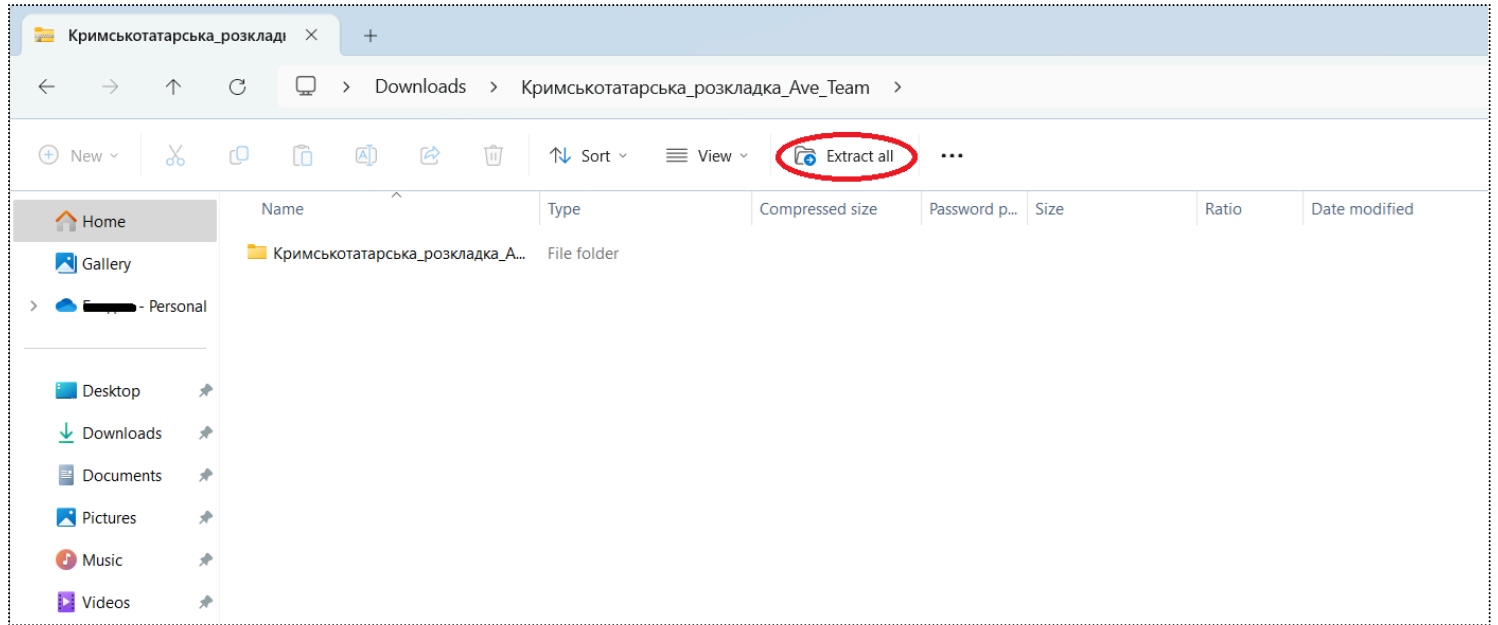

### 2. Extract the Files:

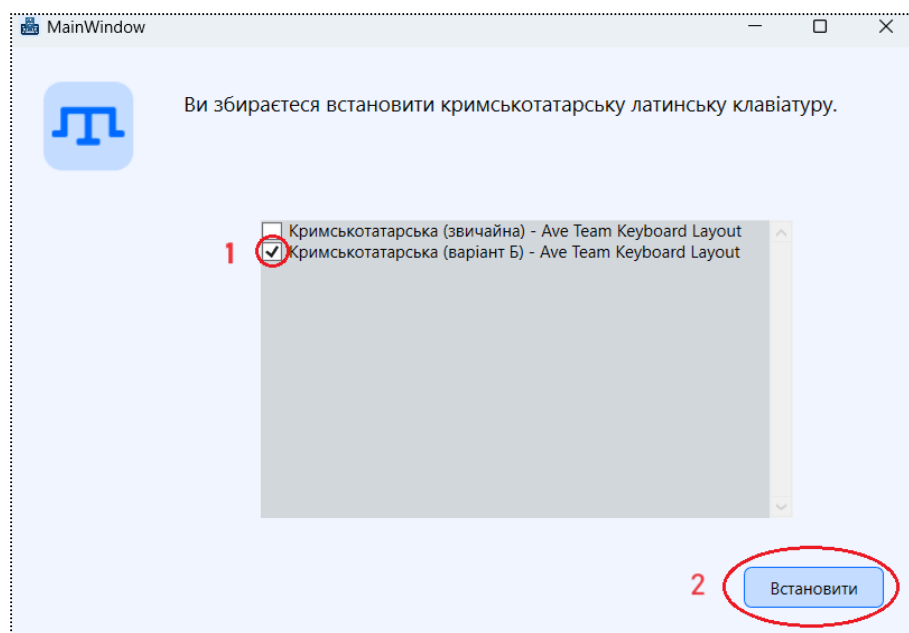

- Locate the downloaded zip file (usually in your "Downloads" folder).
- Right-click on the file and choose "Extract All."
- It's recommended to extract the files to the same "Downloads" folder for easy access.

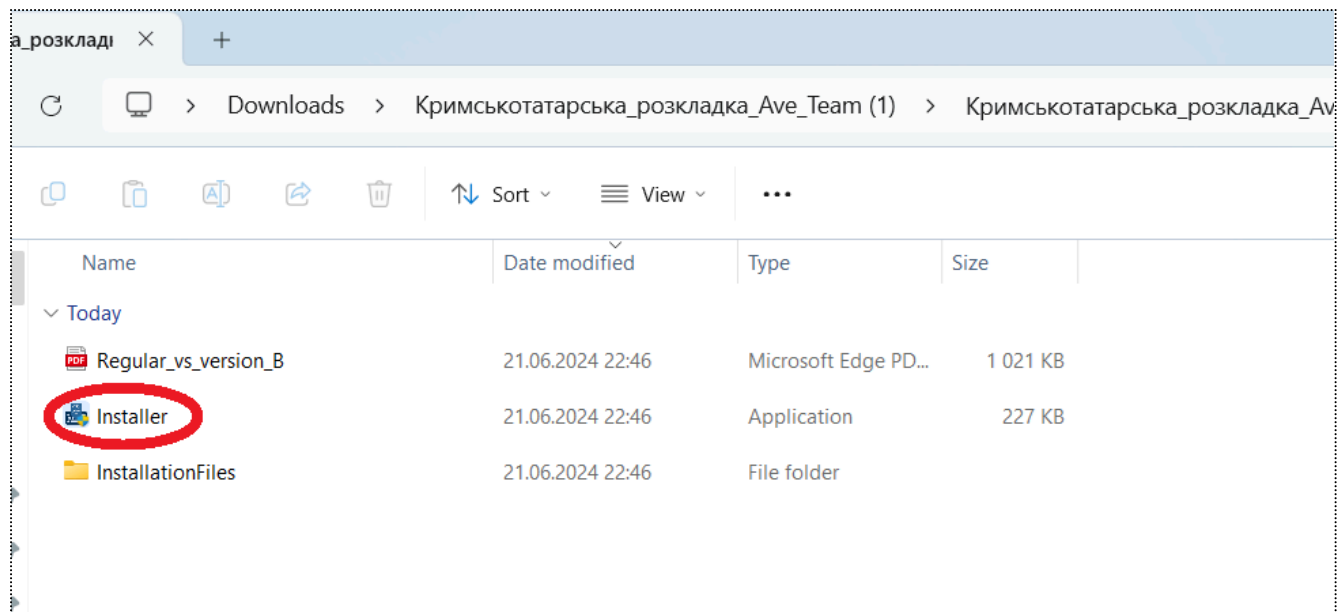

### 3. Install the Layout:

- Open the extracted folder.
- Double-click on the installer file (usually an .exe file).

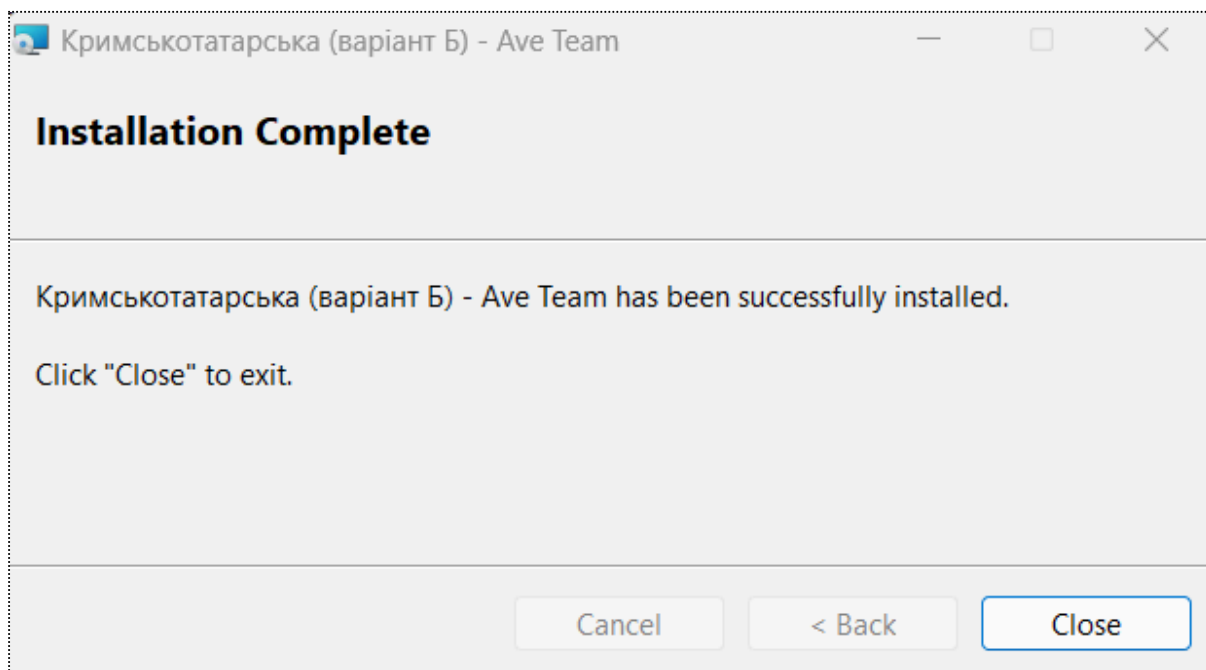

- Select the second installation option and click "Встановити" (Install).
- After opening the folder open installer
- Select second option and press "Встановити" that means "Install"

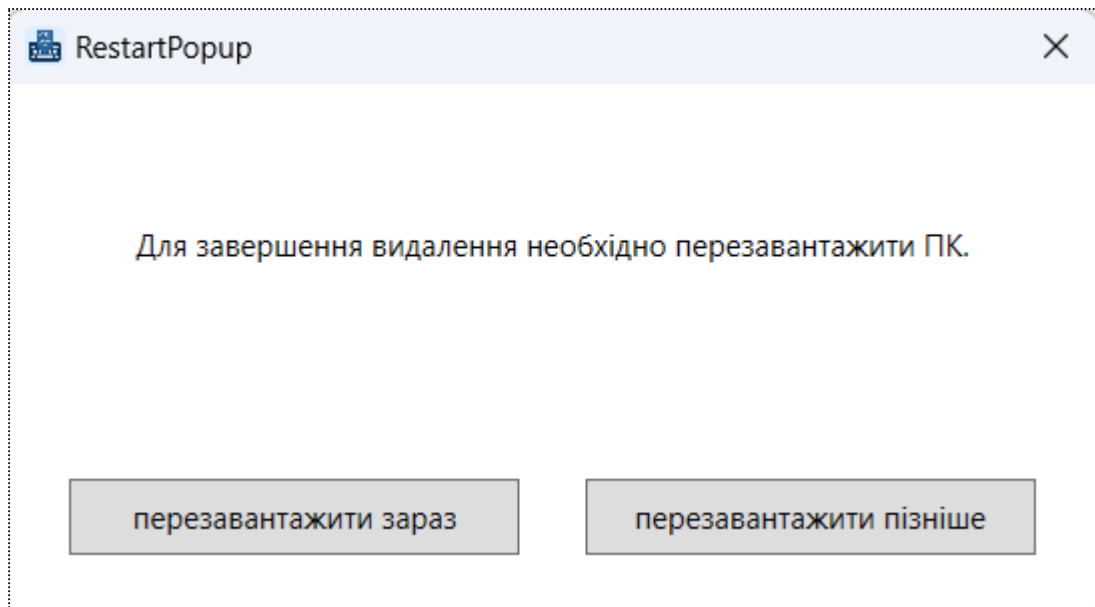

#### 4. Restart Your Computer:

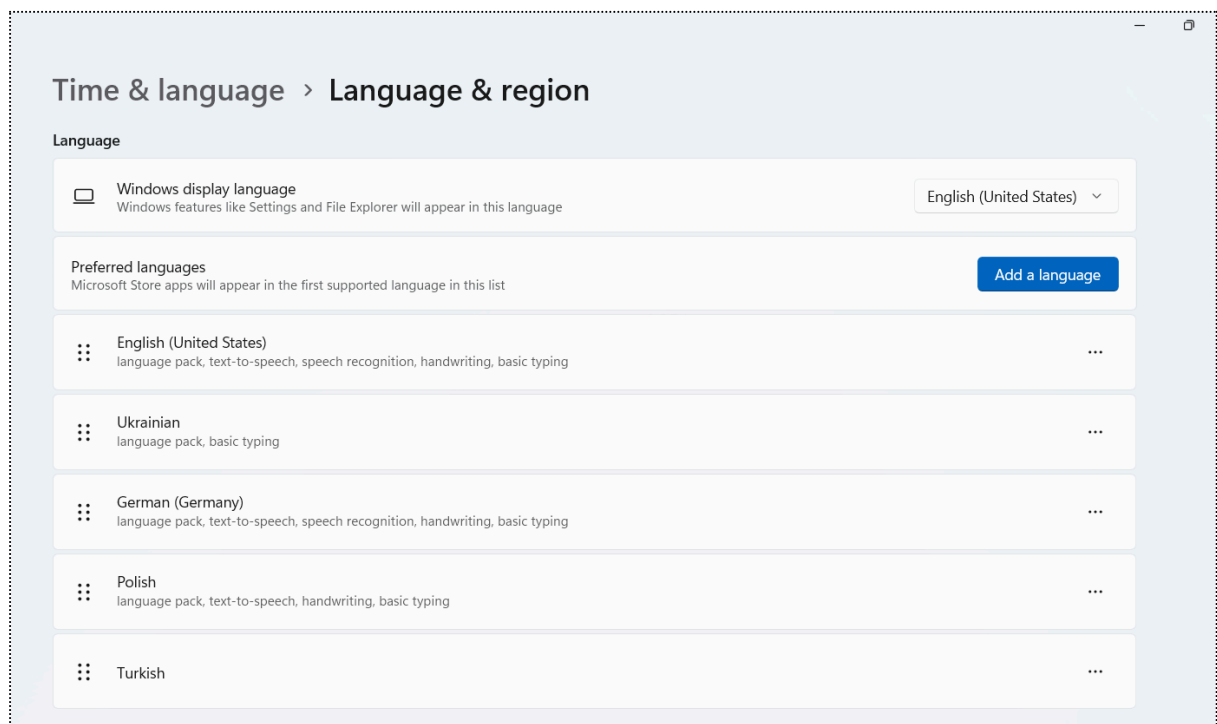

- You've now installed the keyboard layout! Restart your computer to apply the changes. Click "перезавантажити зараз" (Restart now).

## 5. Verify Installation:

- After restarting, go to your Windows settings. You should see the new layout installed, likely listed as Turkish. This is normal, as it includes all the special characters needed for Crimean Tatar.
